

Simulované žíhání - řešení Sudoku

Aplikované evoluční algoritmy

Bc. Samuel Kuchta

Vedoucí: Ing. Jakub Husa

28. dubna 2024

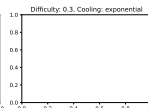

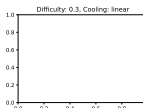

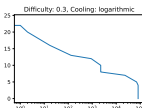

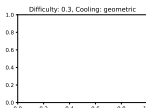

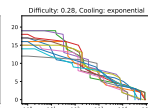

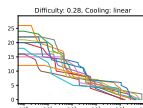

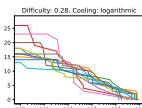

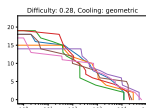

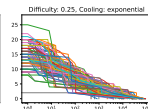

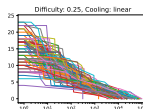

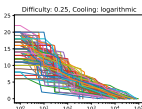

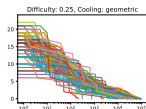

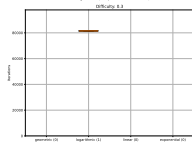

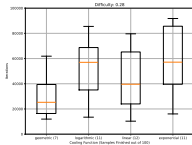

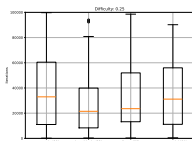

- **Vstupy:** validní nevyřešená sudoku.
- **Výstupy:** grafy průběhu řešení sudoku pomocí různých nastavení simulovaného žíhání.

- Naprogramovat funkce pro práci se Sudoku.
- Naprogramovat algoritmus simulovaného žíhání.
- Vizualizace efektivity různých metod chlazení.
- Vyzkoušet metodu adaptivního chlazení.

- Inicializace podle složitosti 0-1.
- Doplnění neopakujících se náhodných hodnot 0-9 do čtverců
- Řešení simulovaným žiháním

- logaritmické
- lineární
- geometrické
- exponenciální
- adaptivní
